A Tradition of Excellence-A Vision for Tomorrow

Greetings,

This letter is to inform all stakeholders that any and all information regarding Lee County Board of Education facilities testing and inspections can be found on the county website under the Operations Page. Lee County board of Education will ensure all stakeholders work and learn in the safest conditions possible. We comply with all State and national mandates and will continue to make strides to rid every site of dangerous conditions.

As we currently stand any school that has products known to me made with asbestos are encapsulated and are completely safe for building occupants. As we renovate sites containing products that have used asbestos we will employ licensed and certified asbestos abatement specialist.

We are proud of each of our facilities and we are proud to continue to make them better each year. Both the voluntary lead test results and asbestos certifications are listed on the website to review at your leisure.

As always thank you for your support of Lee County Schools,

A handwritten signature in cursive script, reading "Marcus Fuller".

Mr. Marcus Fuller,
Assistant Superintendent of Operations
